

Combing the hair roots to fundamentally  
solve hair problems.

A completely new styling approach.

A completely new hair menu without using  
scissors or chemicals. By combing the hair  
with a special scissor comb, TOKIKATA offers a new "solution" to  
make your daily styling more aligned  
with your ideal look.

# TOKIKATA

Growth habits ·  
Front hair splitting

Lack of volume

Frizziness ·  
Hair puffiness

A completely new hair conditioning  
menu that solves  
hair problems and makes daily styling easier.

# TOKIKATA

## For whom?

For those who want easy daily hair style.

For those who want to solve frizziness and hair puffiness.

For those concerned about lack of volume at the top.

For those who want to improve the texture of their hair.

For those who want to keep their scalp clean.

For those who want to improve their hair quality.

## How?

A special scissor comb, TOKIKATA, will control hair's curl and texture. Instead of using treatment products, TOKIKATA combs through the hair roots to remove blockages in the hair follicles. During the treatment, enjoy the relaxing sensation of a rhythmic scalp massage.

\*The treatment is performed by a hairstylist trained in the TOKIKATA technique.

## What are the benefits?

- By removing unnecessary sebum from clogged pores, each hair strand is freed, making it easier to achieve natural hair flow and ideal styling.
- Since the micro tangles at the hair roots are untangled, the top gains volume, while the sides decrease in volume.
- The hair is conditioned to attract moisture from the air (electrostatic state), giving each strand shine and smoothness.
- With the scalp's pores cleared, it creates a healthy environment for growing shiny, strong hair.
